

MaaT Pharma is a clinical-stage biotechnology company and industry leader in microbiome therapies in oncology, leveraging our whole ecosystem restoration approach to develop biotherapies to treat serious diseases.

We are implementing an innovative new medical approach focused on the gut microbiota as a source of drug candidates, leveraging our drug development expertise, our gutPrint® computational biology platform and our biomanufacturing capabilities. Our pipeline consists of several drug candidates, the first of which is now in Phase 3 clinical testing.

We are driven by our pioneering spirit and are now the first microbiome-derived drug development company listed in continental Europe; we listed on Euronext Paris on November 8, 2021.

We have a humanistic approach to our entrepreneurial adventure. Every recruitment is an opportunity to consolidate our rich and diverse human capital, which will soon reach 50 people.

Currently based in Lyon (7st), with the opening of our future site of more than 1500 m² which will be based in Saint-Quentin-Fallavier (38) in 2023, we are looking for a:

PHARMACEUTICAL DEVELOPMENT TECHNICIAN

By joining MaaT Pharma, you will have the opportunity to participate in the development and production of solutions at the cutting edge of pharmaceutical innovation. You will organize and carry out the development operations of our future co-fermented drug candidates.

More precisely your mission will be:

With agility.

- *Participate in creation of experimental plans and laboratory planning to address a given development issue. Ensure the consistency of the schedule and update it with hierarchy.*
- *Implement actions to ensure the implementation of the plan and ensure the proper functioning of the laboratory: stocks, equipment, documentation, cleaning, security.*

With Rigor.

- *Ensure redaction of test documents*
- *Manage bench work execution and production of development and stability batches*
- *Detect incidents, new elements or relevant facts, participate in investigations and improvements*
- *Control the quality of your products and work*
- *Perform a first level analysis, interpretation and synthesis with your hierarchy.*

With Kindness,

- Communicate incidents, new elements, relevant facts.
- Participate actively in exchanges, to conflict resolution and to transfer knowledge. Present results.
- Submit technical and human proposals as part of continuous improvement of the department.

Support ecosystem: Industrialization and Production

- Collaborate with production and industrialization team if necessary.

As you probably understood, this is a job at the very heart of the research and development activity which allow you to discover a demanding and exciting universe!

To succeed and grow with us you ideally have:

- Advanced technician diploma in life sciences or microbiology
- Minimum 3 years' experience in the biotechnology field, ideally in pharmaceutical development on bacterial products.
- Work experience in Biosafety Level Laboratories (BSL2)
- Solid knowledge in microbiology, particularly in fermentation and/or clarification/purification of bacterial solutions
- Strong knowledge of pharmaceutical constraints and the cGMP environment.
- Fluent French, written and oral

Following experience would be a plus:

- Experience in pharmaceutical productions of biotech products
- Experience in flow cytometry
- Experience in metagenomics and more specifically in the field of microbiota

You also have these skills:

- Excellent organization
- Agility and adaptability
- Autonomy,
- Team spirit,
- Submit proposal
- Pragmatism and rigor.

It's very easy to join us,

Apply for this position by sending your **CV and cover letter** to: careers@maat-pharma.com

The whole team is looking forward to integrating you into the MaaT Pharma adventure.
