MaaT Pharma is a clinical-stage biotechnology company and industry leader in microbiome therapies in oncology, leveraging our whole ecosystem approach to develop biotherapies to treat serious diseases. We are implementing an innovative new medical approach focused on the gut microbiota as a source of drug candidates, leveraging our drug development expertise, our gutPrint® computational biology platform and our biomanufacturing capabilities. Our pipeline consists of several drug candidates, the first of which is now in Phase 3 clinical testing.

We are driven by our pioneering spirit and are the first microbiome-derived drug development company listed in continental Europe, with an IPO on EURONEXT Paris in November 2021. We have a humanistic approach to our entrepreneurial adventure. Every recruitment is an opportunity to consolidate our rich and diverse human capital, which now exceeds more than 60 people.

Currently based in Lyon (7th), we are looking for a :

Bioinformatician (M/F)
Permanent position
Position able to people with disabilities

Job Description

By joining MaaT Pharma, you will have the chance to participate in the development and production of solutions at the cutting edge of pharmaceutical innovation. Reporting to the Manager of the gutPrint® bioinformatics platform, you will occupy a versatile position at the heart of our company's pharmaceutical development challenges.

The position is to be filled as soon as possible.

Main responsibilities

- Participate in "omics" data analysis;
- Use the tools of the gutPrint® bioinformatics platform following established procedures to produce analysis reports;
- Monitor the progress of analyses;
- Organize data, ensuring its integrity throughout its lifecycle, from raw data transfer to archiving of analysis results;
- Participate in data interpretation and presentation of results;
- Participate in the improvement of analytical processes;
- Participate in the validation and development of bioinformatics tools.

Additional tasks may be assigned depending on the candidate's experience and expertise.

As you can tell, this is a position at the heart of our product development activity. This will for sure allow you to dive into an environment with high standards and passion.

Qualifications and experience

- Diploma from Bac +2 in bioinformatics or computer science applied to biology;
- At least 1 year's successful experience in a similar position;
- Good knowledge of NGS data handling and analysis;
- Knowledge of the R language and data visualization packages;
- Knowledge of the Linux environment and the Bash language;
- Good level of English.

Working at MaaT Pharma means working in a friendly and stimulating work environment with challenges, within a passionate team with the opportunity to develop your skills and grow.

If you are motivated to join a curious team of human size and evolving in an entrepreneurial and innovative environment, then join us by applying for this offer and send us an email with your resume and your motivation to: careers@maat-pharma.com.
