

MaaT Pharma is a clinical-stage biotechnology company and industry leader in microbiome therapies in oncology, leveraging our whole ecosystem approach to develop biotherapies to treat serious diseases. We are implementing an innovative new medical approach focused on the gut microbiota as a source of drug candidates, leveraging our drug development expertise, our gutPrint® computational biology platform and our biomanufacturing capabilities. Our pipeline consists of several drug candidates, the first of which is now in Phase 3 clinical testing.

We are driven by our pioneering spirit and are the first microbiome-derived drug development company listed in continental Europe, with an IPO on Euronext Paris in November 2021. We have a humanistic approach to our entrepreneurial adventure. Every recruitment is an opportunity to consolidate our rich and diverse human capital, which now exceeds more than 60 people.

Currently based in Lyon (7th arrondissement), we are looking for a :

Bioinformatics Manager (M/F)
6 months contract (July to November)
Position able to people with disabilities

Job Description

By joining MaaT Pharma, you will have the chance to participate in the development and production of solutions at the cutting edge of pharmaceutical innovation. Reporting to the Chief Scientific Officer, you will occupy a versatile position at the heart of our company's pharmaceutical development challenges.

Main responsibilities

- Manage the gutPrint® Data Analysis bioinformatics platform, i.e. coordinate projects involving the characterization of microbiota using metagenomic approaches, as well as the development and maintenance of associated bioinformatics tools ;
- Ensure that the team implements analysis projects formulated by internal collaborators, while respecting deadlines and priorities ;
- Propose data analysis plans in collaboration with project managers, take part in the analysis and interpretation of metagenomic data on gut microbiota from a microbial ecology perspective, and ensure that results are presented in reports ;
- Participate in project management for the development and maintenance of proprietary bioinformatics tools, in compliance with best practices, specifications and deadlines ;
- Manage a team of 5 people.

As you can tell, this is a position at the heart of our product development activity. This will for sure allow you to dive into an environment with high standards and passion.

Qualifications and experience

- PhD in bioinformatics or data analysis ;
- At least 5 years' successful experience in a position combining management and project management ;
- Good knowledge of microbiota characterization using metagenomic approaches, and of human intestinal microbiota ;
- Knowledge of the R language and data visualization packages; mastery of the Linux environment and the Bash language ;
- Good level of English.

You are a good communicator (able to explain solutions in simple terms), dynamic and adaptable. Dynamic and a good listener, you are proactive, rigorous and a good team player. These are the qualities we are looking for in this great opportunity.

Working at MaaT Pharma means working in a friendly and stimulating work environment with challenges, within a passionate team with the opportunity to develop your skills and grow.

If you are motivated to join a curious team of human size and evolving in an entrepreneurial and innovative environment, then join us by applying for this offer and send us an email with your resume and your motivation to: careers@maat-pharma.com.
