

MaaT Pharma is a late-stage clinical biotechnology company and a leader in the development of microbiome-based drugs designed to modulate the immune system of cancer patients and improve their survival. Backed by an expert team committed to making a difference for patients worldwide, the company was founded in 2014 and is headquartered in Lyon, France.

A pioneer in its field, MaaT Pharma reached a major milestone in January 2025 with positive topline results from its Phase 3 clinical trial evaluating its microbiome-based immunomodulatory drug candidate in oncology. Leveraging its proprietary pooling technology (combining donations of healthy microbiota) and microbial co-culture platform, MaaT Pharma is at the forefront of microbiotherapy—a new therapeutic class—and is initially focused on improving survival outcomes for cancer patients. MaaT Pharma has been listed on Euronext Paris (MAAT) since 2021.

Based in Lyon's 7th arrondissement, we are currently seeking a:

Quality Assurance Intern (M/F)

Open to candidates with disabilities

Job Description

Reporting to the Quality Assurance Manager, you will join MaaT Pharma's QA team for a 6-month internship starting in January or February 2026.

Your Main Responsibilities

- Supplier and subcontractor quality:
 - Participate in the supplier lifecycle management (qualification, evaluation, monitoring)
 - Contribute to the drafting, updating, and follow-up of quality agreements
 - Assist in the preparation and follow-up of supplier audits (internal/external)
- Quality process monitoring:
 - Monitor non-conformities, deviations, and complaints: recording, analysis, and follow-up of action plans
 - Participate in the management of CAPAs (Corrective and Preventive Actions)
 - Contribute to the analysis of quality indicators and the preparation of quality reviews
- Quality documentation:
 - Assist in drafting, updating, and distributing procedures (SOPs)
 - Check the compliance of quality documents
 - Contribute to the archiving and structuring of the document management system

Qualifications and Experience

- Currently pursuing a Master's degree (Bac+4/5) in Pharmacy, Biotechnology or Quality
- Strong interest in quality systems and pharmaceutical regulations
- Proficient in spoken and written English
- Knowledge of quality standards (GMP, ICH E6-GCP, ISO, etc.)

You are a strong communicator with excellent adaptability. You are known for your out-of-the-box thinking, energy, active listening skills, and proactivity, as well as a great team spirit—all qualities we value for this exciting opportunity.

If you're motivated to join a curious, human-sized team working in an innovative and entrepreneurial environment, we encourage you to apply by sending your CV and a brief motivation email to: careers@maat-pharma.com
