

MaaT Pharma is a late-stage clinical biotechnology company and a leader in the development of microbiome-based drugs designed to modulate the immune system of cancer patients and improve their survival. Founded in 2014 and headquartered in Lyon, France, the Company is backed by a passionate and expert team committed to making a difference for patients worldwide. A pioneer in its field, MaaT Pharma achieved a major milestone in January 2025 with positive topline results from its Phase 3 clinical trial evaluating its microbiome-based immunomodulatory drug candidate in oncology. Leveraging its proprietary pooling technology (combining donations of healthy microbiota) and microbial co-culture platform, MaaT Pharma is at the forefront of microbiotherapy—a new therapeutic class—and is initially focused on improving survival outcomes for cancer patients. MaaT Pharma has been listed on Euronext Paris (MAAT) since 2021.

Based in Saint-Quentin-Fallavier (38), we are currently seeking an:

Biological Collection Project Manager (M/F)

Open to candidates with disabilities

Job Description

Reporting to the Production, Industrialization and Supply Chain Manager, you will be MaaT Pharma's point of contact for all activities related to biological sample collection. You will lead projects in collaboration with the collection partner, ensure sample quality, and oversee the implementation of the product safety strategy.

Start date: as soon as possible

Your Main Responsibilities

- **Lead and coordinate the collection process:** manage centers and laboratories, propose improvements, handle risks and deviations;
- **Coordinate all collection-related projects:** manage schedules, budgets, and resources in collaboration with partners and internal departments (Production, Industrialization, and Projects);
- **Provide technical and scientific expertise** for the quality of collected stool samples (tests performed on donors and samples), in a constantly evolving scientific and regulatory environment;
- **Contribute to the regulatory strategy related to collection:** update safety strategy documents, analyze collection data, liaise with the internal Regulatory department, and lead the Product Safety Committee;
- **Act as MaaT's reference and liaison** between the collection service provider and MaaT Pharma on all collection-related matters.

Qualifications and Experience

- Master's degree or higher (engineering or scientific background);
- 8 to 10 years of experience, including at least 5 years in a biological/analytical lab, pharmaceutical or biotech industry;
- Proven experience in partnership management;
- Scientific and regulatory expertise (biological testing, GMP, ISO, etc.);
- Excellent interpersonal and leadership skills;
- Ability to work in a multidisciplinary and regulated environment;
- Strong project management skills (planning, budgeting, action tracking);
- Fluent in English (spoken and written).

You are a strong communicator who adapts quickly. You are known for creative, out-of-the-box thinking, energy, active listening, initiative, and a genuine team spirit, all are qualities we highly value for this role.
