

MaaT Pharma is a late-stage clinical biotechnology company and a leader in the development of microbiome-based drugs designed to modulate the immune system of cancer patients and improve their survival. Backed by an expert team committed to making a difference for patients worldwide, the company was founded in 2014 and is headquartered in Lyon, France.

A pioneer in its field, MaaT Pharma reached a major milestone in January 2025 with positive topline results from its Phase 3 clinical trial evaluating its microbiome-based immunomodulatory drug candidate in oncology. Leveraging its proprietary pooling technology (combining donations of healthy microbiota) and microbial co-culture platform, MaaT Pharma is at the forefront of microbiotherapy—a new therapeutic class—and is initially focused on improving survival outcomes for cancer patients. MaaT Pharma has been listed on Euronext Paris (MAAT) since 2021.

Based in Saint-Quentin-Fallavier (38), we are currently seeking a:

Industrialization Intern (M/F)

Open to candidates with disabilities

Job Description

Reporting to the Production, Supply Chain and Industrialization Manager, you will contribute to industrial development and process optimization. Your goal will be to support the team in scale-up activities, productivity improvement, optimization of existing product processes, and implementation of new processes.

Start date : Beginning of 2026 for 6 months.

Your Main Responsibilities

- Identify and propose improvements, optimizations, and evolutions for manufacturing processes and equipment;
- Analyze malfunctions and critical steps in the manufacturing process to enhance reliability;
- Create and update technical documentation for production lines: operating procedures, control techniques, qualification documents, validation protocols, risk analyses, etc.;
- Plan, coordinate, and carry out trials in collaboration with relevant teams.

Qualifications and Experience

- Final-year student in engineering school or Master's degree (M2) with a specialization in bioprocesses, process engineering, biotechnology, or industrial pharmacy;
- Interest in technical and industrial environments;
- Analytical mindset, rigor, autonomy, and ability to work in a team;
- Previous experience in a GMP environment would be a plus;
- Written and spoken English.

You are a strong communicator with excellent adaptability. You are known for your out-of-the-box thinking, energy, active listening skills, and proactivity, as well as a great team spirit—all qualities we value for this exciting opportunity.

If you're motivated to join a curious, human-sized team working in an innovative and entrepreneurial environment, we encourage you to apply by sending your CV and a brief motivation email to: careers@maat-pharma.com
